## OPTIMIZED DESIGN

Every material has unique characteristics that are considered when we design our glove fit. We choose the best materials for the task at hand, then design the fit specs around the materials to ensure comfort and durability.

## ENGINEERED FIT

Different situations have different fit requirements. We design our gloves with our industry leading flawless fit system that defines up to 16 application driven measurements to provide best in class fit.

## TIGHT TOLERANCES

Our factories are held to the highest standards of quality control to ensure that every glove meets our superior level of quality. This guarantees that the first glove off the line fits exactly the same as the last one.
