

Bland, licensed civil engineer and president of Adhesives Technology Corporation.

“It’s just taken a few years for the individual states to rewrite their transportation codes to catch up with the vertical construction requirements. Adhesives Technology was prepared for this regulatory shift and has brought to market a complete line of code compliant adhesives with both transportation infrastructure and vertical construction as a focus.”

BLAND

Adhesives Technology Corporation, located in Pompano Beach Florida, has been a leader in the construction adhesives industry for decades; and is the manufacturer behind new ULTRABOND HS-1CC, which ATC says is the world’s strongest anchoring epoxy. ULTRABOND HS-1CC is also the first to be building code compliant in both bulk and cartridge delivery systems. HS-1CC is the flagship product in a comprehensive line of code approved products and is listed in the Approved Materials Lists in 34 of the 38 applicable states maintaining such lists, with the other 4 pending. Visit atcepoxy.com/dot for a complete listing of products for your state.

BRIGHTON BEST/US ANCHOR

The U.S. Anchor brand from Brighton-Best International has been providing quality anchoring products since 1985. It’s ICC-ES and Miami-Dade County Cracked Concrete approved Ultrawedge+ has been successfully supplied through distribution since 1996.

The product line consists of a full offering of light-medium and heavy duty anchoring products for construction and industrial applications.

“Two new product lines will be introduced in the first and second quarters of 2020,” says James Hahn, U.S. Anchor product

U.S. Anchor’s Ultra-wedge+ anchor has been a standard for Florida builders since 1996. This year, the company is bringing out a new Tapping SD concrete screw and a new line of color coated screws for impact windows.

ATC confidently states that its new ULTRABOND HS-1CC is the world’s strongest anchoring epoxy. HS-1CC is code compliant in both bulk and cartridge systems.

manager. “They include the Tapping SD standard blue concrete screw and a companion product called Trim Head Color Coated Concrete Screws for the Florida impact window industry. Both series will have the Miami-Dade County approval.”

Brighton-Best is entering the larger-diameter concrete screw line this spring with the Tapping HD, which will also have the ICC-ES approval for cracked concrete.

“Brighton-Best International is currently conducting comprehensive testing for its non-code anchoring products,” Hahn adds. “These generic anchors include standard zinc, HDG and stainless wedge types as well as zinc drop-in versions. They are being independently tested by a leading test lab in North America. We will be in a position to offer reliable and verifiable pull out, shear and other data for distributors and their

HAHN

customers. The completed test report will be available in late February.”
